

PRUNING MACHINE

FOR ORCHARDS

HAZELNUT
TREES

CITRUS TREES

OLIVE TREES

CE

Model
[FL300N]

ADVANTAGES OF THE MECHANICAL PRUNING

- Labour costs reduction
- It favours air and light circulation
- It favours agricultural machines movement
- It allows an uniform application of chemical products on the leaves
- It favours the application of fertilizers and products against grass on the ground
- It has very positive effects on production

TECHNICAL FEATURES

Machine weight (Kg)	270
Hydraulic unit weight (with oil) (Kg)	150
Max height of vertical work (hedging) (Mt)	5,4
Max height of horizontal work (topping) (Mt)	3,5
Tractor power (Kw)	11
Work ability with disc (ha/h)	1
Work ability with knives (ha/h)	2
Tractor attack	front
Disc diameter	350 - 400

OPTIONAL

Protection net against worker's accidents

40 or 80 Lt. Hydraulic tank with pump group
Overgear
Filter
Cooling radiator
3 points attack

Control Box or joystick for electro hydraulic distributor
